

## Recent Find

I have seen these glasses mixed in with and being sold as peanut butter glasses. I have never seen them in a boxed set or with identifying information. I admit my complete lack of knowledge about them. These well could be listed as mystery glasses but I am sure just to me. I will leave it up to guys like Brian or John to explain. In the meantime, this is one very neat find. Other than a little aging, the box is in great shape and glasses are like new.

## Mystery Glass

Size and style would say that it is another 5" peanut butter glass. Help! Any Info?
